Log Balance Beam Surface Mount Installation Instructions

INSTALLATION
Read installation instructions thoroughly before starting installation process.

STEP 1: Log Crawl is shipped in on piece to site. Attach Leg plates with bolts provided. Utilize foam or other means to protect log from damage when moving Log into place. Carefully place Log into final installation location. Mark center of hole on mounting plate.

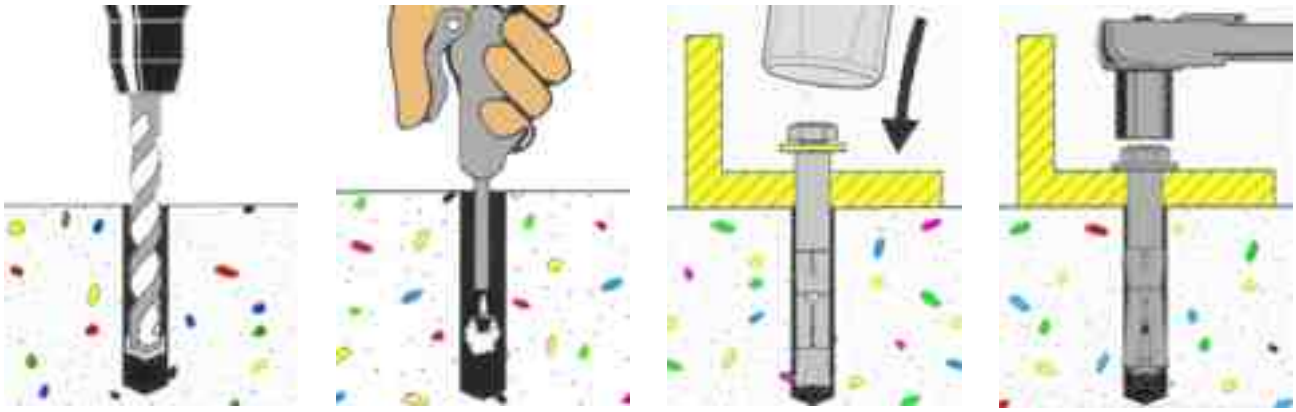
STEP 2: Select a carbide drill bit with a diameter equal to the anchor diameter. Drill hole to any depth exceeding the desired embedment.

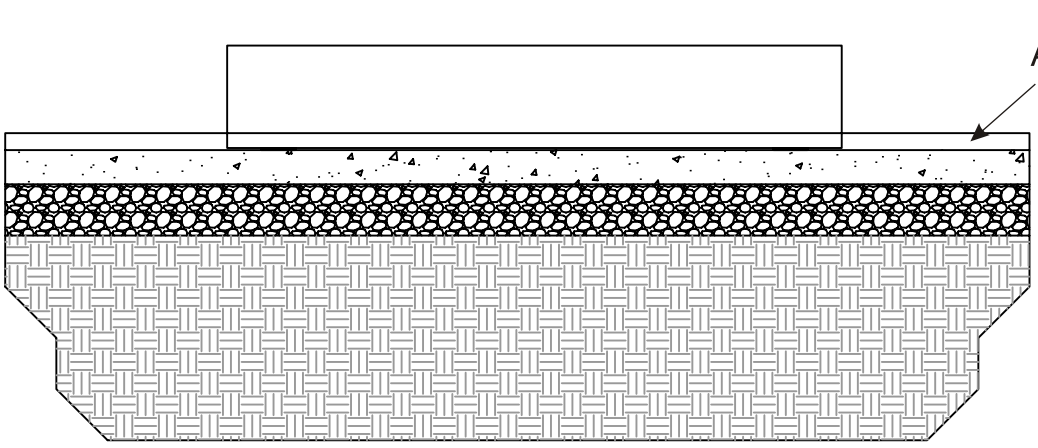
STEP 3: Clean hole or continue drilling to accommodate drill fines. (concrete dust) - Please wear eye protection.

STEP 4: Drive the anchor into the hole through material being fastened until washer is flush with material being mounted. Expand anchor by tightening the nut or head 2 to 3 turns.

NOTE: Bracing material may be required during assembly. Place a brick or equivalent at the bottom of ground holes to provide a solid foundation. Allow for this in hole depth.

NOTE: Shock absorbing properties of safety surfacing materials vary. A soft, resilient surface should be placed around all climbers, extending at least eight feet in all directions surrounding the climber. NEVER INSTALL PLAY EQUIPMENT ON CONCRETE OR ASPHALT. A fall on a hard surface can result in serious injury to the equipment user.





WARNING
INSTALLATION OVER A HARD SURFACE SUCH AS CONCRETE, ASPHALT, OR PACKED EARTH MAY RESULT IN SERIOUS INJURY OR DEATH FROM FALLS.
